Industrial Enclosures: You Imagine It, We Build It

As the exclusive North American importer for Hummel products, Sealcon is able to provide Enclosures that meet the highest requirements and toughest demands of today's market. We offer complete custom solutions including an abundance of customization options.

Our durable Enclosures are available in various materials like Polycarbonate, ABS, Polyester, Aluminum, Steel or Stainless Steel in many different sizes. Enclosures can be customized in many ways, including adding cable strain relief, conduit, circular connectors, terminal blocks, DIN rails, mounting plates, hinges and latches, and other accessories. We can even put solutions together with third party components, as supplied by the customer.

In addition, we offer EEx e (Hazardous Location) / ATEX Enclosures suitable for offshore/marine applications and Enclosures with optional EMI/RFI shielding. Laser engraving, silk screening, painting or powder-coating of the enclosure is also available. We have custom cutting options like thru-holes, tapped holes, slotted holes, and Enclosures scored for knockouts. We can also provide CAD drawings for any Enclosure if the specifications are provided.

Sealcon will build and customize Enclosures to suit your needs. With our wide array of offered products, you can get everything you need all from one great company!

Technical Information varies dependent upon Enclosure material and specifications.
