

## PRODUCT SPOTLIGHT

### Wadi-XL Cable Gland

#### Extra Large Cable Glands

Demand for larger & oversized brass fittings is constantly increasing, especially in offshore and renewable energy applications. Sealcon now offers Hummel's WADI-XL Cable Gland with up to 4" BSPP and Metric M110 thread sizes. This and other larger metric sizes can now be found in our catalog or online.

#### We Protect All Cable Sizes & Applications!

The new WADI-XL version will accommodate a cable range of 1.89"-3.54" (48-90 mm). This product is available in Metric: M63, M75, M80, M90, M100, M110 and BSPP (British Standard Pipe Parallel) Threads: G2 ½", G3" & G4" sizes. Due to the continuing demand, various types of metric thread sizes even above M63 can be found in our catalog. The M63 Enlarged version with a cable range of 48-55 mm (1.89"-2.17") and additional sizes M75, M80, M90, M100 and M110 are offered with different seal materials, depending on your application. For use in oily environments, Nickel Plated Brass is best suited. For outdoor applications and saline environments, the HSK-XL fittings can be equipped with an EPDM seal. Furthermore, Silicone - for high or low temperatures, or Viton® (FPM) - for applications that require chemical resistance, are available upon request.
