SEALCON HENSEL ENCLOSURE Mi 9100

Empty boxes with hinged lid

Mi 9100

• Built-in dimensions W 125 x H 275 x D 150

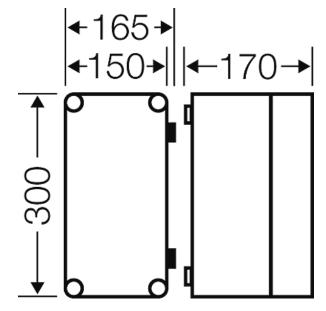

- max. installation depth with built-in mounting plate 146 mm, with built-in DIN rail 135 mm
- please order DIN rails, mounting plates or covers additionally
- 3 walls with metric knockouts for cable entry and assembly
- trilaterally combinable
- lid hinges attached
- · with transparent, hinged lid
- lid fasteners for tool operation
- material: PC (polycarbonate)
- protection class: II
- colour: grey, RAL 7035

width	165 mm
height	300 mm
depth	170 mm
weight	1,413 kg

HENSEL ENCLOSURE Mi 9100

Note:

Supplementing references regarding outdoor installation - harsh environment and / or outdoor: - The materials used for the Mi System are basically UV resistant, so that the mechanical resistance of the boxes is maintained during UV effect. Depending on the intensity of the UV effect e.g. transparent lids can become intransparent. - The top side of the boxes should be protected by a cover against weather influences such as rains, ice and snow. - Further on, also chemical influences have to be considered with the selection of the installation place - apart from the IP rating and climatic effects. - In order to keep the maximum permissible ambient temperature of the installed equipment as well as for the prevention from condensation additional measures as ventilation and/or heating may be necessary.

For material properties see technical data.
